**Now with rugged
Pelican case**

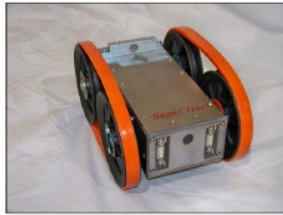

Super Trac V
Robotic Inspection &
Cleaning System!

The Super Trac V robotic systems give you more choices so you can design the robotic system that fits your needs and budget. Select from the basic one camera vehicle system (recommended for inspection & documentation only) or the two camera vehicle system (recommended for inspection & cleaning) and then add the options that best suit your needs from power brushing to air washing to spraying to manual inspecting. Add it all up and you have a Super Trac V system that fits your needs and budget! Nowhere can you find a better value in robotic systems!

Super Trac V Robotic Systems

The Super Trac V - One Camera System is the most economical robotic system that is designed for inspection and documentation projects. It's a great marketing tool because you can show your customer the before and after conditions. It lets you inspect, narrate, record and made a DVD of your inspection on your laptop computer. It includes:

1-ST02   **Super Trac V One Camera Vehicle System**
- (1) Large LCD color monitor
- (1) Analog to digital converter that connects to your laptop computer (you supply)
- (1) Recording and editing software for your laptop computer
- (1) Built-in microphone
- (1) 3' 110 volt power cord
- (1) Basic vehicle -- 6.75" (w) x 10.25" (l) x 5" (h) w/front camera and 2 high intensity lamps
- (1) Control Box
- (1) 100' cable with connectors
- (1) Extra set of tracks
- (2) Extra high intensity lamps
- (1) Rugged Pelican Case

The Super Trac V - Two Camera System is designed for inspection, documentation and cleaning projects. It lets you see forward and backward so you can better monitor your cleaning activities. It also lets you inspect, narrate, record and made a DVD of your inspection and cleaning on your laptop computer. It includes:

1-ST04   **Super Trac V Two Camera Vehicle System**
- (1) Large LCD color monitor
- (1) Analog to digital converter that connects to your laptop computer (you supply)
- (1) Recording and editing software for your laptop computer
- (1) Built-in microphone
- (1) 3' 110 volt power cord
- (1) Basic vehicle w/front camera with 2 high intensity lamps and rear camera with 2 high intensity lamps
- (1) Viewing switch to view front or rear camera image
- (1) Control Box
- (1) 100' cable with connectors
- (1) Extra set of tracks
- (4) Extra light bulbs
- (1) Rugged Pelican case

Note: Laptop requirements include: Windows 7, Vista (SP2). XP (SP3); Intel Pentium or ADM Athlon 1.8 GHz; 1 GB memory; DirectX 9 or 10 graphics card with 64 MB; DirextX 9 or higher sound card; 3.2GB of disk space and DVD-ROM drive to install software.

Air Washing Package

The <u>newly expanded</u> air washing package is used with your air compressor and is designed to provide you with the maximum air washing and whipping capability. It includes:
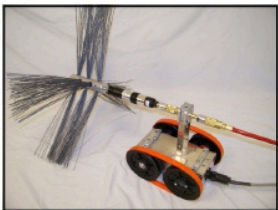

2-ST01   **Air Washing Package**
(1) On/off control & pressure regulator assembly
(1) Forward air sweep assembly
(1) Dual whip tee assembly
(1) Air broom assembly
(2) Octopus air whip assembly
(2) Tri whip assembly
(1) Single whip assembly

Power Brushing Package

The power brushing package is used with your air compressor and provides superior cleaning over air washing or air whips because brushing provides more contact with the duct surface. The power brushing package is designed to clean ductwork from 8" to 22" high regardless of duct width and includes:
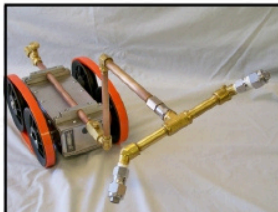

2-ST03   **Power Brushing Package**
(2) Nylon brushes (18", 24")
(2) Silica carbide brushes (18", 24")
(1) Variable height assembly
(1) Reversible air motor assembly
(1) On/off control & pressure regulator assembly

Spraying Package

The spraying package has been improved and is now is designed to apply coatings and sanitizers in ductwork from 8" to 36" high regardless of width. Coating insulation or duct board after cleaning locks down any remaining loose fibers and provides a much more durable air stream surface. A surface that is more resistant to the accumulation of dirt, moisture and other contaminates. Sanitizing ductwork is a big plus in the fight to improve indoor air quality.
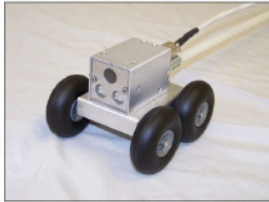

2-ST02   **Spraying Package**
(1) Base wand with check valve and flow control valve
(3) 360° spray nozzles for ductwork 8" - 20" high
(2) Assemblies to position 360° spray tips at 4", 6" or 8" off
      bottom of the duct
(1) Spinning assembly for ductwork 20" - 36" high
(2) Assemblies for spinning assembly to set height at 12" and 18"
      off bottom of the duct
(1) Fluid coupler (used with airless sprayer)
(1) On/off control (used for airless sprayer)
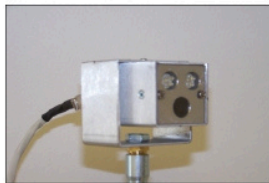

Manual Inspection Package

The <u>new</u> manual inspection package lets you use your Super Trac control box and monitor to do manual inspections and documentation. The small color camera fits almost anywhere and like the robotic systems you can inspect, narrate, record and made a DVD of your inspection on your laptop computer. The package includes:

2-ST07   **Manual Inspection Package**
(1) Color camera 1.75" x 1.75" x 2"
    with 2 bright light LED lamps
(1) 50' camera cable
(4) 4' flexible rods
(1) Camera cart
(1) Vertical shaft inspection bracket

Super Trac Accessories

This step down transformer (220v to 110v) is required to operate the Super Trac robotic system in countries with 220v power.

SIE012   (500 watt) Step down transformer (220v to 110v)
SIE060   Bright light lamp
2-ST28   Replacement orange track
2-ST05   Replacement 100' cable for single camera vehicle
2-ST06   Replacement 100' cable for dual camera vehicle
